Toilet paper rolls feed freely until depleted and level of supply is constantly visible for low-level warning. Waste receptacle is emptied manually on cycle determined by maintenance needs. Toilet paper rolls, paper seat covers and waste receptacle are serviced by unlocking and opening door. Locked door prevents inadvertent dumping and unauthorized removal. Waste container safety-edged finger hole provides convenient grip for service. Toilet paper spindles are carried in vandal resistant sub-frame accessible when door is opened. Barrier baffle panels preserve privacy between stalls at all times.
