REVISED: 03-09

TOILET PAPER HOLDER

SPECIFICATION

Toilet Paper Roll Holder shall be fabricated of triple chrome plated rust proof Zamak. Roller shall hold and dispense all standard core roll tissue up to 5" diameter (Ø127). One stainless steel hex socket set screw shall be provided along perimeter of each roll holder post flange for anchoring to stainless steel adjustable wall bracket. Roll holder posts shall be theft resistant when tempered hardened stainless steel set screws are installed and tightened into brackets. Two (2) wall anchors shall be provided. Roller shall be plastic with internal spring for tension and shall be removable from brackets for easy loading. Unit shall meet appropriate FHA and other federal specifications.

INSTALLATION

Each Wall bracket is surface mounted using two (2) #8 pan head screws (provided by others to suit conditions) through holes provided. Roll holder posts are mounted over top leg of brackets and secured by set screws from underside. For compliance with ADA Accessibility Guidelines install unit so that tissue roll centerline is between 44" (1118) maximum above finished floor (Max AFF) and 19" (483) minimum AFF.
