CIRCULAR COUNTERTOP WASTE CHUTE

SPECIFICATION

Circular waste chute shall be fabricated from heavy gauge alloy 18-8 stainless steel, type 304. All exposed rolled flange and interior surfaces of the chute shall have satin finish. Unit provides waste deposit access to receptacle (not furnished) placed under countertop opening.

INSTALLATION

Unit is designed for permanent installation in 5-3/4" diameter (Ø146) hole in any countertop. Fill in underside of waste chute lip and around portion of waste chute body that protrudes down into mounting hole with silicone sealant (not furnished). Install unit into countertop hole. Once unit is set in place, wipe off any excess silicone sealant with a clean rag.
